What is DocuParesm?

A software service which will compare two electronic documents much more quickly and efficiently than a human is capable of.

What are the Benefits of DocuParesm?

- Eliminates errors and omissions often associated with visual comparisons
- Provides easy compliance to government agencies requesting support documentation
- Complete results format makes for easy follow-up and review
- Allows greater utilization of office staff
- Reduces overall costs associated with the comparison process

Who is DocuParesm for?

State Agencies or Regulatory Departments of companies who have to review Product Labels and other documents in which changes have been made, and there is a need to see exactly what changes were made to create a new version.

Which types of Documents can be Compared?

Any document (label, MSDS, CSF, etc.) in a PDF format, unsecured, created from an electronic document (scanned images cannot be compared). If a product label and the associated EPA Stamped Label are both in PDF format, they may be compared. Distributor Label can be compared against a sub-registrant label.

How does DocuParesm work?

You submit two documents (PDF) to us. They are converted to text (graphics extracted) and compared electronically.

How long does DocuParesm take?

Results are returned via email within 48 hours.

What do the results of DocuParesm look like?

Resultant comparison file is made up of three sections.

1. Full text of the document with colors, underscores, and strikethroughs to represent insertions, deletions, moves and replacements.
2. A numbered list of the specific changes, with the full text of each change.
3. A summary of the number of insertions, deletions, etc.

A service of the KRSNetworksm that will provide significant savings in time and costs.
