

Fertilizer Tonnage Reporting

Features... for States:

- Electronic data reception is fast, accurate and cost-effective
- Administrative functions allow authorized Department personnel to print reports and review data
- UFTRS data can be exported and submitted to UKY
- Paper-based applications can be entered into the same web-based system

Features... for Manufacturers:

- Data may be entered for all states, but system reports only for those states or time-periods that are required
- Tonnage is entered via a secure, web-based system
- Fees are automatically calculated, taking into account any state-specific minimums
- Pay for multiple states in a single credit-card, ACH or paper check transaction
- State data (brand names, company names, etc.) is pre-filled into forms but corrections are allowed for nutrient and micro-nutrient values
- Data can be imported from Formushare for further savings in data entry time
- Agents responsible for multiple companies have a single username and password

Benefits:

- Web-based electronic format accepted by states
- Report only data that is required by each state
- Data entry process has been optimized for usability to ensure minimal key-strokes, using drop-down lists and intelligent short-lists where possible
- State data is updated on a regular basis, by the states, to maintain accuracy of reporting standards

The Online solution for tonnage reporting that is fast, accurate and easy to use.
