

KSTREaMS

Kelly State Regulatory, Enforcement and Management System

Features:

- Web-based Registrations, Licenses and Reporting
- Every aspect of State Dept. of Ag. Agency program operation (e.g. Pesticides, Fertilizers, Feed, Seeds, Animal Remedies, Weights & Measures, Applicators and Dealer Licensing)
- Aggregation of data and information for security analysis.
- Enforcement functions
- Molds to individual state laws, rules and regulations
- Provides a level of standardization to nationwide constituents
- Revenues generated by convenience fees; no income-reduction to state

Benefits:

- Immediate compliance with state-wide E-Commerce edicts
- Greater office and program efficiency
- Greater audit ability
- Significant reduction in error rates
- Greater acceptance and access by the public
- Reduced IT investment
- Ongoing use of cutting-edge technology
- Additional revenue from enhanced compliance
- Reduced cost of compliance for state and regulated community

Modules Currently Available:

- www.kellysolutions.com – search state data for free
- ERenewals – electronic renewals of products, licenses, registrations
- Document Submit – electronic submission of labels and MSDS's
- UPC Submit – electronic submission of universal product codes
- Industrial PDA with patent-pending software applications, barcode scanners, GPS receivers, and other accessories
