

VolCom<sup>SM</sup>

### Features:

- Validation of Dealers / Business Licenses of the Seller
- Validation of Product Registrations by product in each state
- Validation of RUP Applicators (category specific) and other Permits of the Buyer
- Validation at the State, Region and County levels
- Stops sale if validation fails at any step in the process
- Performs recording / reporting of completed sales
- Reports created for seller and each state about what was sold (for mill / tonnage taxes)
- Real-time Compliance Validation at point-of-sale
- Utilizes the same registration / license data maintained at [www.kellysolutions.com](http://www.kellysolutions.com)
- Ability to use Registrant data if it is a Registrant-supported, eCommerce venue website

### Benefits:

- Meets the demand for increased scrutiny and security in the sales of pesticides and other regulated products which terminate within the borders of North America
- Applies to sales originating from any country around the world
- Stops illegal sales before the transaction can be completed
- Creates a permanent record of Internet sales in a secure data base and is available for investigation by approved Government agencies when necessary

**Ensuring the Legal sales of pesticides, fertilizers and other regulated products via the Internet.**
